

JOB ANALYSIS

We are seeking a self-motivated team player for our Job Analysis/Scheduling position. The ideal candidate will possess experience with MRP/ERP systems and will have experience in planning/scheduling. Solid organization and communication skills as well as proven attention to detail are key components for this role. Detailed knowledge of Microsoft Excel is required.

The successful candidate will open and close jobs as dictated by the MRP system, help develop/track measurements including job and first pass yields, costs analysis, and communicate results through weekly reports, create and maintain part numbers and their BOM/MOMs, develop and utilize the scheduling module of the ERP system.

Salary range is negotiable. The position is based in Mississauga, ON, Canada.
