CAN-Bluetooth Converter
P/N: AX141150

CAN-Bluetooth Gateway transfers wireless data to a PC, smartphone, display or tablet.

Features:
- CAN bus (SAE J1939)
- Configurable baud rate
- Bluetooth (Classic & BLE)
- 164 ft. range
- 8-60Vdc (12V or 24Vdc nominal) with load dump
- -30 to +85°C
- IP67
- Compact, ultrasonic welded enclosure
- 6-pin TE Deutsch type connector
- CE marking
- Vibration and shock compliance for off-highway applications
- Configurable via CAN2BT Configuration Android smartphone application or an Apple iOS application.
- Can be used with BT MAP Tool Android smartphone application to configure many Axiomatic devices
- The CAN-Bluetooth gateway can be accessed also using both Android and Apple phones or tablets.

Ordering Part Numbers:
SAE J1939 CAN-Bluetooth Gateway: AX141150

Accessories:
CAN2BT Configuration Android smartphone application is available from Google Play.

Apple iOS application – contact Axiomatic.

Electronic Assistant AX070502

The CAN-Bluetooth Converter can access the configuration setpoints of other Axiomatic CAN devices connected to the CAN bus. The Android app for this is called the BT MAP Tool Android smartphone application, available from Google Play.

AX070119 Mating Plug Kit: Mating Plug Kit (1 DT06-6S, 1 W6S, 6 0462-201-16141)
**Description:** The CAN-Bluetooth Converter transfers wireless data to a PC, smartphone, display or tablet. The setpoints are configurable using the CAN2BT Configuration Android smartphone application or an Apple iOS application. It has rugged packaging and performance for IP67, high vibration and off-highway machine environments. SAE J1939 is the CAN bus protocol; however, the CAN-Bluetooth Converter also handles CAN frames with standard ID’s. The gateway has a configurable baud rate.

The device supports both Bluetooth standards, Classic and Low Energy (BLE). However, the BLE access is targeted for configuration purposes only due to its limited bandwidth.

The CAN-Bluetooth devices can be used as a pair for creating a bridge for CAN data. The bridge is always created using Classic Bluetooth for high data throughput.

User Interface  
CAN2BT Configuration Application is available from Google Play.  
A configuration application for Apple iOS can be developed on request.

CAN User Interface  
Axiomatic Electronic Assistant (AX070502)  
In Interface mode, the user can set SAE J1939 parameters using the EA tool.

Software Flashing  
New software can be flashed over the CAN bus using the EA (AX070502).

Using the AX141150 as a mapping tool for other Axiomatic CAN devices.  
The CAN2BT device can access the configuration setpoints of other Axiomatic CAN devices connected to the CAN bus. The Android app for this is called the BT MAP Tool, available from Google Play.

Network Termination  
It is necessary to terminate the network with external termination resistors. The resistors are 120 Ohm, 0.25W minimum, metal film or similar type. They should be placed between CAN_H and CAN_L terminals at both ends of the network.

Operating Conditions  
-30 to 85 °C (-22 to 185 °F)

Protection  
IP67

Weight  
0.15 lb. (0.06 kg)

Approvals  
CE marking

Vibration (Pending)  
MIL-STD-202G, Method 204D test condition C (Sine) and Method 214A, test condition B (Random)  
10 g peak (Sine)  
7.68 Gms peak (Random)

Shock (Pending)  
MIL-STD-202G, Method 213B, test condition A  
50g (half sine pulse, 9ms long, 8 per axis)

Enclosure  
Molded Enclosure, Ultrasonic welded  
Nylon 6/6, 30% glass  
Integral 6-pin connector  
Refer to the dimensional drawing.

Electrical Connections  
6 pin Deutsch IPD connector P/N: DT04-6P  
A mating plug kit is available as Axiomatic P/N: AX070119.

Mounting  
Mounting holes are sized for #8 or M4 bolts. The bolt length will be determined by the end-user's mounting plate thickness. The mounting flange of the controller is 0.425 inches (10.8 mm) thick. It should be mounted with connectors facing left or right to reduce likelihood of moisture entry. All field wiring should be suitable for the operating temperature range. Install the unit with appropriate space available for servicing and for adequate wire harness access (6 inches or 15 cm) and strain relief (12 inches or 30 cm).
