

## Electrical Engineer

A leading manufacturer of electronic controllers for the mobile industry is looking for an Electrical Engineer to support new applications for a growing market.

Working within the Application Engineering department, you will be responsible for problem-solving and debugging, new product validation, and customization of existing designs. Customer support will play a key role, and international travel may be required. Your responsibilities will also include technical support to the marketing, sales and production departments.

The ideal candidate will have excellent interpersonal and communication skills, with 1 to 3 years experience in an electronics field and must be able to work well and adapt in a fast-paced environment. A successful applicant will have the opportunity to further develop their background and skills, while working with a great team of people in a fast-paced production environment.
