

PRESS RELEASE

April 24, 2006 – Paris, France

Axiomatic releases a CAN Input Module with 9 current outputs to drive multiple 12 or 24V proportional valves while operating at 80V for machine control in harsh environments.

The AX021200 valve controller features:

- 1 CAN port (CANopen or J1939)
- 9 proportional outputs (2A) up to a 6A maximum
- 80VDC power input accepted (72VDC nominal)
- Application-specific software
- Rugged IP67 packaging and connectors
- RS-232 serial port for user interface via PC

Typical applications can include:

- Off-highway construction equipment
- Municipal vehicles
- Material handling equipment
- Utility vehicles

72VDC power, CAN input,
9 proportional outputs
– AX021200 Valve Controller

Axiomatic operates in Mississauga (Toronto), Canada and Tampere, Finland. As an integrated ISO9001:2000 engineering design and manufacturing firm, our mission is to provide advanced electronic controls for mobile, marine, mining, military and industrial equipment OEM's.

Visit Axiomatic at Intermat 2006, Booth# 5a D 081 in Paris, France, April 24-29, 2006.
