

PRESS RELEASE

April 6, 2009 – Mississauga, Ontario, Canada

## Axiomatic Technologies Catalog

Axiomatic Technologies announces the release of our new printed catalog, which highlights our growing lines of compact rugged controllers packaged for harsh operating environments.

Our catalog includes a broad range of CAN SAE J1939 or CANopen I/O modules, valve drivers, engine temperature monitoring devices and battery chargers, as well as analog controls, DC converters, surge protectors and much more.

Each model number is listed for easy ordering, and provides input/output specifications and packaging dimensions. It is a condensed yet helpful tool to assist in which products are right for you and your application.

We recognize, however, that there are thousands of applications that are new, unique, or too complicated, such that no generic product could meet all the needs. For this reason, Axiomatic offers rapid development of new control solutions for OEM requirements. Please contact Axiomatic for OEM control design or off-the-shelf solutions.

Axiomatic is a provider of electronic machine controls, components, and systems to the off-highway, military, power generation, material handling and industrial OEM markets. We provide efficient, innovative solutions that focus on adding value for our customers. We emphasize service and partnership with our customers, suppliers, and employees to build long term relationships and mutual trust.
