

PRESS RELEASE

May 31, 2022 – Mississauga, ON, Canada

Axiomatic Technologies Corporation releases a new controller with four universal signal inputs.

The AX030440 controller accepts four universal signal inputs that are configurable as Voltage, Current, Resistive, Frequency, PWM, and Digital. It communicates through CANopen®. This IP67 rated unit has reverse polarity protection and under- and over-voltage protections. It is also protected against short to GND and shorts to Nominal Vps.

Axiomatic designs valve controllers for a wide range of applications such as machine automation.
