REACH Compliance Statement

Axiomatic Technologies Corporation does not manufacture substances on their own or in preparations.

Axiomatic Technologies Corporation manufactures electronic machine controls which are considered to be articles according to the EU REACH Regulation. These products are not intended to release any substance under normal and reasonable foreseeable conditions of use.

Axiomatic Technologies Corporation is a downstream user. (i. e. We use substances, either on their own or in preparations to manufacture or process our products.) We understand we have obligations under REACH to insure all chemistries used comply with REACH requirements.

Axiomatic Technologies Corporation has reviewed all chemistries used in the manufacturing of its products and no SVHC (Substance of Very High Concern) are used or added in our processes.

We do not supply articles containing substances on the REACH, SVHC candidate list in a concentration above 0.1% w/w. When updated candidate lists are published by the ECHA (European Chemicals Agency), we review the process chemistries of our articles to identify any parts containing SVHC. Any articles with content above 0.1% w/w will be reported and customers receiving articles containing SVHC will be informed through email.

We obtain formal assurance from our suppliers of their intention to comply with the requirements of REACH for substances they supply to us, so that these substances will remain available to us for use in the future.

A handwritten signature in black ink that reads "Tom W. Peat".

Tom Peat

Director of IT and Operations
