

PRESS RELEASE

January 5, 2022 – Mississauga, Canada

Axiomatic controllers provide safe, affordable, precise control of solenoids for off-highway machine hydraulics systems.

The AX022950 controller was designed for SIL 2 applications for safe operation in critical operations for off-highway machines.

The AX022950 features 12VDC or 24VDC nominal power input, 7 Digital Inputs for Switches and Proximity Sensors, 6 Digital Outputs up to 4A for On/Off Hydraulic Valves (4 high sourced and 2 low sourced) and 4 Sourcing LED Outputs (up to 50 mA). There is 1 CAN (SAE J1939) port for control networking and its enclosure is IP67 rated. It meets the EMC, environmental and vibration requirements of off-highway equipment applications.

Other Axiomatic rugged solenoid controllers offer compact and affordable solutions for distributed control on machines.
