

## Axiomatic Released at CONEXPO 2026, a Rugged Automotive Ethernet to Ethernet Switch, AX141510, that Supports Speeds Up to One Gigabit Per Second, Designed for Autonomous Vehicles in On-Highway, Off-Highway, and Mining Applications.

AX141510

The Axiomatic Gigabit Automotive Ethernet to Gigabit Ethernet Switch, [AX141510](#), is a 4-port switch that enables communication between three 1000BASE-T1 Automotive Ethernet ports and one 1000BASE-T Ethernet port.

The switch operates with a nominal power supply input of 12 or 24 VDC (9 to 36 VDC power supply range) and is protected against surge, reverse polarity, over-voltage, and under-voltage faults. The unit features an IP67-rated, laser welded, injection molded enclosure and cover with M12 connectors. [AX141510](#) runs on a web server and can be configured through the web interface.

You can browse through our catalog of [Automotive Ethernet Switches](#) and other [Connectivity Solutions](#).
