

RTC Module

1 Universal Signal Input

2 CANopen®

P/N: AX141121

Features:

- Real Time Clock Battery backup
- 1 Universal input signal (0-5V; 0-10V; 4-20 mA; Frequency or PWM Signal)
- 2 CAN ports (CANopen®)
- SPN 237 Vehicle Identification Number supported
- Operational 8...90 Vdc (12 Vdc, 24 Vdc or 48Vdc)
- LED indicator
- Integrated 8-pin connector (equivalent to TE Deutsch)
- Compact, fully sealed enclosure, IP67
- EDS File

Description:

The RTC Module permits time and date information with a battery backed up Real-Time-Clock (RTC). It has one universal signal input and 2 CANopen® bus ports. The universal input can interface with a command signal (0-5V; 0-10V; 4-20 mA; Frequency or PWM) or it can serve as "clock synchronization" trigger. For example, the RTC date and time could only be set when the input is triggered. The battery backup permits 15 years of operation. Power is 12V, 24V or 48Vdc nominal. The controller is ruggedly packaged for harsh operating environments.

Applications:

- Industrial Cranes
- Heavy equipment

Technical Specifications:

Specifications are indicative and subject to change. Actual performance will vary depending on the application and operating conditions. Users should satisfy themselves that the product is suitable for use in the intended application. All our products carry a limited warranty against defects in material and workmanship. Please refer to our Warranty, Application Approvals/Limitations and Return Materials Process as described on <https://www.axiomatic.com/service/>.

Power

Power Supply Input - Nominal	12V, 24V or 48Vdc nominal; 8...90 Vdc The minimum allowable supply voltage for the power pin is 7 Vdc.
Surge Protection	Meets the surge requirements of SAE J1445
Reverse Polarity Protection	Provided
RTC Battery Supply	Battery backup – RTC, 3V 15 years operation minimum

Control Software

Software Platform	<p>Pre-programmed with standard logic. Refer to the user manual.</p> <p><i>Note: During the first start, the device's parameters are set to default. Also, the time and date of the RTC can be adjusted via CAN. So, it is possible to use the RTC module without configuration for default input type configurations. However, in this case, it will not be possible to change other parameters (such as an Input Type).</i></p>
