

PRESS RELEASE

December 1, 2017 – Mississauga, Canada

Axiomatic releases a Bluetooth capable Single Valve Controller, DIN 43650A mounting style as part of its connectivity program.

The Valve Controller, AX020900 is configurable via Bluetooth with the Axiomatic CAN2BT smartphone application for Android phones. It has a high frequency switching output (PWM) to drive one solenoid up to 2.5A. It accepts one current, voltage, PWM, frequency or digital signal input for interface with sensors, joysticks or switches. Designed for machine applications, it is vibration compliant, rated to IP67 and operates from -30 to +85°C. An LED indicator provides status of operation and the M12 connector simplifies wiring.

Other Axiomatic connectivity products include the CAN/Ethernet Converter, Ethernet Switch as well as the CAN-Bluetooth Converter and various NFC configurable controllers.
