

PRESS RELEASE

May 31, 2022 – Mississauga, ON, Canada

Axiomatic Technologies Corporation has developed a range of protocol converters to support data exchange between 2 CAN networks and RS-422.

The protocol converters in the AX14032X series act as a gateway or interface between CAN buses with different baud rates and protocols (SAE J1939 to SAE J1939 or SAE J1939 to CANopen®). It also facilitates fast data exchange between a CAN network (SAE J1939 or CANopen®) and a RS-422 bus (SAE J1587 or Modbus RTU). It is operational from 9 to 36 Vdc.

Protections on these fully sealed IP67 rated units include surge protection and reverse polarity protection.

Axiomatic designs protocol converters that are suited for a wide range of applications, such as mobile (off-highway) equipment, transport vehicles, and power genset control systems.
